DEPARTMENT OF EDUCATION

STATISTICAL TERMS AND DEFINITIONS

Personnel

A superintendent is an employee whose duties are mainly in connection with the general control or administration of a county or city school system.

A supervisor is an employee who devotes half or more than half of his time to supervision in any county or city.

A supervising principal is an employee who devotes half or more than half of his time to administration and supervision of instruction in the school over which he has charge.

A Counselor is an employee who devotes half or more than half of his time to counseling.

A teacher is an employee who devotes more than half of his time to classroom instruction. An elementary school teacher is a teacher who devotes more than half of his teaching time to instruction in grades 1-6. A high school teacher is a teacher who devotes half or more than half of his teaching time to instruction in grades 7-12.

Teachers employed includes all regular, special, substitute, and part-time teachers who were employed for any part of the year. Persons who give some of their time to the duties of a supervisor or principal but who devote the major portion of their time to the classroom instruction are included here. The number of teachers employed in any county may exceed the number of teaching positions as explained below.

Teaching positions refer to the number of persons that would be required to fill all teaching positions in a school or school system at one and the same time. In other words it is the number of teachers necessary to fill all teaching positions if none were to resign or leave during the year. For instance, if two persons were employed at different times to teach the same one-teacher school during the same term, only one teaching position would be reported. Positions of superintendents, supervisors, and principals are not included unless the occupants of such positions devoted more than half of their time to classroom instruction.

Enrollment and Attendance

Pupils enrolled means the number of different pupils who have attended school at sometime during the school year, and who have not previously attended in any other school system in Alabama during the same school year.

Aggregate attendance is the sum obtained by adding together the number of days attendance of individual pupils.

Average daily attendance is obtained for the State by adding together the average daily attendance reported for the several individual schools. In the individual schools, average daily attendance is obtained by dividing the aggregate attendance by the length of term in days.

Length of term in days is the actual number of days taught.

Enrollment by grades is on the 6—3—3 basis. In those schools reporting only eleven grades, each grade is reported as given by the local superintendent of schools.

Receipts

Revenue receipts are those receipts which represent an actual increase in resources available for operation of the schools and which have no financial obligations attached, do not incur indebtedness, or decrease the amount of value of property. For example, receipts from a school entertainment may have a financial obligation attached if any costs have been involved. Any balance or profit is a revenue receipt.

Gross revenue receipts include school revenues from all sources without regard to whether those funds are used within the county or city.

Net revenue receipts are gross revenue receipts less deductions for appropriations to other school units or payment to other school units for transferred pupils.

Nonrevenue receipts are those receipts which change the type of resources, incur indebtedness, or decrease the amount or value of property. Money received for a building which has burned, for example, constitutes a nonrevenue receipt. The insurance money simply takes the place in whole or in part of the burned building and does not add to the resources available for the schools.

Philanthropic fund is money received by some school systems from various endowment funds.

State funds are funds derived directly from State appropriations for education.

County funds include receipts from county-wide sources such as county-wide taxes and appropriations from county commissioners.

Local funds include receipts which are limited to local or district usage, such as district tax funds, appropriations from city councils, etc.

Local school funds are receipts and payments of local schools not handled by custodians of school funds.

Federal funds are funds derived directly from Federal appropriations to education and emergency Federal funds allocated directly to boards of education, which funds are handled by custodians of school funds.

Payments

General Control includes payments for business and educational administration on a county or city-wide basis.

Instructional Service in day schools includes payments for salaries and expenses of teachers, principals, and supervisors for instructional supplies, school libraries, and free textbooks.

Free Textbooks are textbooks supplied at state, county, or city expense.

Allocations of Current Expenditures Between Elementary and High School. Certain expenditures cannot be charged directly to elementary and high schools. Such expenditures are allocated between elementary and high schools according to the following ratios:

a. The ratio of elementary teachers' salaries to high school teachers' salaries is used for allocating expenditures for General Control; Supplies, School Libraries, etc.: Operation of School Plant; Maintenance of School Plant; all of Auxiliary Agencies except School Transportation; and Fixed Charges.

b. Expenditures for Transportation are allocated between elementary and high schools according to the ratio of Average Daily Attendance of transported elementary and high school pupils.

Miscellaneous

Capital outlay includes expenditures for new grounds, buildings or equipment, and for alterations that constitute improvements.

Debt service includes payment of any obligations except those incurred during the year and repaid during the year. It also includes all interest payments.

A county school system includes schools within certain towns and cities in the various counties throughout the state with a population of 5,000 or more inhabitants according to the last or next succeeding Federal census. The city limits constitute the school district for a city school system; however it may serve pupils living in the county. A city or town may organize a city school system in accordance with Section 16-11-1, *Code of Alabama, 1975.*

A school is a center used for instructional purposes under the administration of one principal. There may be one, two, or several buildings at the center used for school purposes. Buildings not located on adjacent sites, but under the administration of one principal, are classed as separate schools.

Rank of Teachers' Certificates. Certificates are classified into five ranks according to required training in colleges of standard rank, as follows: AA. one year or more beyond a Master's degree; Rank I, for Master's degree; Rank II, for Bachelor's degree; Rank III, for three years of training; and Rank IV, for two years of training. Steps based on years of experience are as follows: Step 1, 0 years; Step 2, 1 to 4 years, inclusive; Step 3, 5 years or more.

NOTES ON STATISTICS FOR PRIVATE SCHOOLS

UNDER THE PROVISIONS OF THE ALABAMA STATE LAWS, CODE OF ALABAMA 1940, PRIVATE ELEMENTARY AND SECONDARY SCHOOLS ARE REQUIRED TO FILE STATISTICAL REPORTS WITH THE STATE SUPERINTENDENT OF EDUCATION. UNFORTUNATELY, SOME PRIVATE INSTITUTIONS HAVE FAILED TO CO-OPERATE; THEREFORE, THE STATISTICS ARE INCOMPLETE. THE TABLES ON PRIVATE SCHOOLS DO NOT LIST ALL THE PRIVATE AND DENOMINATIONAL SCHOOLS NOW OPERATED IN THE STATE. HOWEVER, MOST OF THE LEADING PRIVATE AND DENOMINATIONAL SCHOOLS NOW BEING OPERATED IN THE STATE ARE LISTED IN THE FOLLOWING TABLES.

PRIVATE EDUCATIONAL INSTITUTIONS, 1979-80
